

YASAMAN KHERADMAND

Product Designer ♦ HCI, Data & AI Research Interests

Contact: (+98) 937 954 6086 ♦ Tehran, Iran ♦ Gmail: y.kheradmand96@gmail.com ♦ Portfolio ♦ LinkedIn

SUMMARY

Product Designer with 5+ years of experience in product design, an academic background in Software Engineering, and professional experience in UX design, information architecture, usability evaluation, design systems, and data-informed product improvement. Graduate research focused on ML/NLP text classification for spam-account detection. Current application focus: Human-Computer Interaction, data-driven UX, and AI-assisted user-facing systems.

RESEARCH INTERESTS

Human-Centered AI; Human-AI Interaction; UX evaluation of AI-assisted interfaces; data-driven UX and UX measurement; information architecture and cognitive load reduction in user-facing digital systems.

EDUCATION

M.Sc. in Software Engineering

2019–2021

Islamic Azad University, Science and Research Branch, Karaj, Iran

GPA: 3.34/4.0 - 16.71/20 ♦ Thesis: 4.0/4.0 - 20/20

Thesis: Improving Spam Detection Accuracy for User Account Security in Social Networks

Supervisors: Dr. Hadi Saboohi; Dr. Azam Bastian-Fard

B.Sc. in Computer Engineering

2014–2018

Islamic Azad University, Dezful, Iran

GPA: 3.61/4.0 - 18.06/20 ♦ Ranked top 3 in cohort (2018)

ACADEMIC RESEARCH

Improving Spam Detection Accuracy for User Account Security in Social Networks

M.Sc. Thesis, 2021

Yasaman Kheradmand, Hadi Saboohi, Azam Bastian-Fard. Islamic Azad University, Science and Research Branch.

- Built an LSTM-based text-classification pipeline using TF-IDF features and supervised learning to detect spam accounts on social networks.
- Evaluated models using classification metrics to reduce bias and improve detection accuracy over baseline methods.
- Research relevance: applied ML/NLP, social computing, user account security, and data-driven evaluation of user-facing systems.

PROFESSIONAL EXPERIENCE

Snapp! - Product Designer, Finance Vertical

Tehran, Iran ♦ Apr. 2025–Present

Iran's leading ride-hailing super-app; driver- and passenger-facing financial products.

- Ran structured usability testing and microcopy studies that raised user comprehension 15% and cut repeated fraud disputes 18%.
- Redesigned transaction-history information architecture for income, deductions, bonuses, and refunds, reducing support tickets 22%.
- Partnered with data teams to identify misunderstood charges and validate transparency improvements in the UI.

Zitel - Product Designer

Tehran, Iran ♦ Jan. 2025–Apr. 2025

- Led end-to-end website redesign; conducted user research, persona development, and journey mapping.
- Ran Microsoft Clarity behavioral analysis and A/B tests to reduce signup-flow friction and bounce rates.
- Built and maintained a custom design system for consistent designer-developer handoff.

Digikala - Product Designer, HR Vertical

Tehran, Iran ♦ Aug. 2022–Mar. 2024

Middle East's largest e-commerce platform; Digital HR squad serving 6,000+ users.

- Redesigned information architecture through card sorting and tree testing, improving main-task success rate across multiple test rounds.
- Kudos Club: raised approximately \$50,000 in six months (B2B) and increased engagement through user-centered iteration.
- Built and owned a scalable web/mobile design system, including tokens, components, patterns, and handoff documentation.

Pexelle - Product Designer

Remote - Apr.–Aug. 2024

- Redesigned onboarding and credential-verification flows; cut submission errors through improved form design and inline validation.

Earlier Roles

2018–2022

- **Paradigm Agency** (Product Designer, Remote/Canada, 2021–2022) - led international relaunch of Inverse School; improved task success, course sales, and DAU.
- **Imofix** (UI/UX Designer, Remote/Switzerland, 2021) - researched European preferences for a home-services marketplace.
- **Freelance** (UI/UX Designer, 2019–2021) - delivered design systems and user-workflow improvements for domestic and international clients.
- **Sepehr Group / Servisan** (Front-End & UI, 2019) - contributed UI, research, and usability testing; the app reached 200,000+ installs.
- **Irantableegh** (Front-End Developer, 2018–2019) - built responsive interfaces in HTML, CSS, and React.

SKILLS

UX/HCI Methods	Usability testing, card sorting, tree testing, information-architecture evaluation, A/B testing, UX measurement and metrics, accessibility (WCAG), interaction design, prototyping.
Data & AI	Python, Pandas, NumPy, PyTorch, TensorFlow, scikit-learn, LSTM networks, TF-IDF vectorization, text classification, supervised learning, model evaluation.
Product Design	Design systems, design tokens, components, patterns, product strategy, UX documentation, data-driven decision-making, AI-powered feature design.
Tools	Figma, FigJam, Adobe Photoshop, Adobe Illustrator, Hotjar, Microsoft Clarity, Principle, Git, Google Colab, Jira, Trello, Confluence, VS Code, ChatGPT, Claude, Figma AI.
Programming	JavaScript, HTML5, CSS3, React, PHP.

CERTIFICATIONS AND TRAINING

Product Management for AI & Data Science — 365 Data Science	2024
Data Cleaning and Preprocessing with Pandas — 365 Data Science	2024
Product Strategy Micro-Certification (PSC) TM — Product School	2023
User Experience Design (80 h) — Amanj Academy	2021
User Interface Design — Designwrich School	2020

LANGUAGES

English - Professional working proficiency	Persian (Farsi) - Native
